

neuropsychoanalysis

Neuropsychoanalysis (NPSA) Ireland Study Group

The Neuropsychoanalysis Study Group is an interdisciplinary group open to neurologists, neuropsychologists, neuroscientists, psychoanalysts, psychoanalytic psychotherapists, psychologists, mental health professionals, philosophers or psychiatrists with an interest in the area of mind and brain. The aim of the Group is to create an environment for interested parties to study and discuss how the insights of neuroscience and psychoanalysis can be synthesised towards a better understanding of mind and brain. The Group is part of an international network with this aim and reports on a regular basis to the International Neuropsychoanalysis Society. The Group also functions as a base for exchanging professional news, enhancing interdisciplinary careers and forming clinical and research collaborations. For more, see: <https://npsa-association.org/>

Format

Each meeting consists of a presentation of neuroscientific research or psychoanalytically-informed clinical work with neurological patients, followed by extensive discussion by the Group. There will also be educational sessions with an open panel format. To join the list, please contact neuropsaireland@gmail.com to apply with a minimum of 2-3 lines, indicating your discipline and nature of your interest. Suggestions about topics or format welcome.

Group leaders

Paul Moore, Psychoanalytic Psychotherapist
Aonghus Ryan, Clinical Psychologist
